

Vanke Logistics Development Co., Ltd.

Waste Management Policy

1. The Company is committed to effectively managing all kinds of waste through reduction of waste generation and pollutant prevention and control in the whole process of design, construction and operation, while reducing the impact on the environment during operations.
2. The Company implements waste collection, weighing and disposal. Our hazardous waste is disposed of with harmless treatment by a qualified third party, and the non-hazardous waste is sorted and collected before being disposed of by the relevant municipalities.
3. The Company is committed to communicating with employees and tenants on a regular basis, carrying out relevant advocacy and education activities, raising the awareness of all stakeholders on emission reduction and waste reduction, and pasting relevant reminders to minimize the waste generated in daily operations.

This policy is developed, revised and interpreted by the Company.

The policy is updated every three years; If necessary, it can be reviewed and updated in a timely manner.
